Ecology of Shallow Lakes brings together current understanding of the mechanisms that drive the diametrically opposite states of water clarity, shown by the cover paintings, found in many shallow lakes and ponds. It gives an outline of the knowledge gained from field observations, experimental

Ecology of Shallow Lakes | Marten Scheffer | Springer

This series of talks explore questions about the structure and function of tropical ecosystems in a rapidly changing world by focusing in depth on three different biomes—rain forests, seasonally dry forests, and savannas. What are the patterns of forest productivity and how does this inform our knowledge of the global carbon cycle?

ATBC 2020 Webinar Series in Tropical Ecology and ...

Vegetation is an assemblage of plant species and the ground cover they provide. It is a general term, without specific reference to particular taxa, life forms, structure, spatial extent, or any other specific botanical or geographic characteristics. It is broader than the term flora which refers to species composition. Perhaps the closest synonym is plant community, but vegetation can, and ...

World-Ecology is a global conversation of academics, activists, and artists committed to understanding human relations of power, production, and environment-making in the web of life. An evolving conversation rather than a theory, the world-ecology approach is unified by a critique of Nature-Society dualisms, a world-historical interpretation of today's planetary crisis, and an emphasis on the ...
