Cultural intelligence or cultural quotient (CQ) is a term used in business, education, government and academic research. Cultural intelligence can be understood as the capability to relate and work effectively across cultures. Originally, the term cultural intelligence and the abbreviation "CQ" was developed by the research done by Christopher Earley (2002) and Earley and Soon Ang (2003).

Topographic maps are graphic representations of the earth's natural and man-made features. The shape and elevation of the terrain are portrayed in them. Elevation is expressed in a 100-meter contour line interval. These maps are fundamental tools for planning, researchers, and studies.
